Safety and Regulations

Operating FIFISH products requests training and practice. Please read through this document before operating in water.

Do NOT touch the running propeller

Avoid overheating of motors, do NOT run the thrusters in air for over 30 seconds

Do NOT throw the ROV when deploying into the water

Do NOT look directly to the LEDs, and do NOT touch the LEDs when they are ON

Beware of the environment while operating the ROV (tide, water level, water traffics, etc.)

Avoid the reefs, rocks, seaweeds, fishline or other objects that may cause damage to or entanglement of the ROV or tether

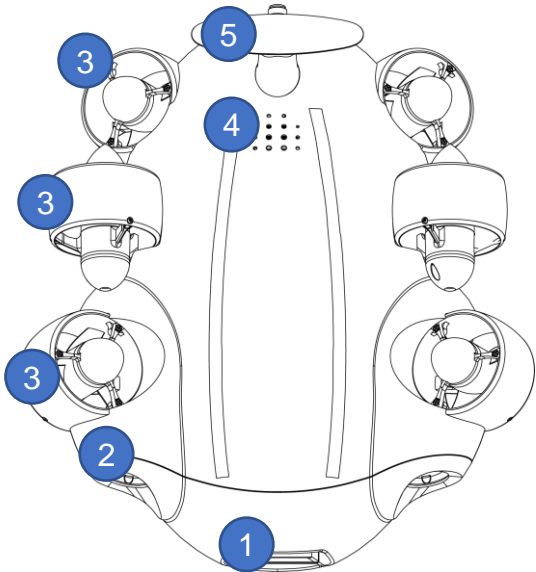

Be part of marine protection and conservation for the local coral and marine life

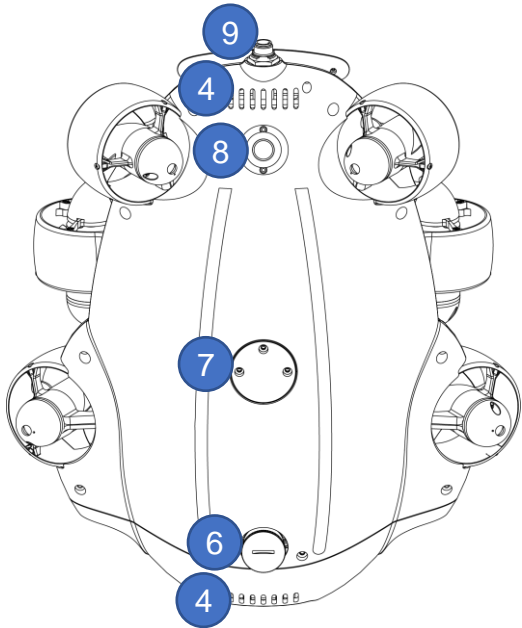

Maintain after dive, check the, Maintenance Guide in page 30-32

Definition, ROV

FIFISH V6 Expert ROV

1. 4K UHD Underwater Camera
2. 3,000 lumens LED × 2
3. Vector Thruster × 6
4. Venting Holes
5. Rear Wing ¹
6. microSD Hot Shoes
7. Mounting Port
8. FIFISH Q-Interface ²
9. ROV Tether Port ³

! NOTE:

1. Do **NOT** shake or swing while holding the rear wing.
2. Hook tether's securing loop on the stem of rear wing when connect (See **Preparation and Connection / Hardware Connection** in page 9-11)
3. The all ports including **FIFISH Q-Interface™** shall be clean and dry at all time.

Definition, RC

RC (Remote Controller)

1. ON/OFF
2. Depth Holding
3. Lock/Unlock
4. Left Control Stick
5. Right Control Stick
6. Right Wheel
7. Left Wheel
8. Video (Record/Stop)
9. Control Mode (Attitude / Sport / Combination)
10. Tether Port
11. Ethernet Port (mini USB)
12. LED Brightness (OFF / 1 / 2)
13. Photo (Snap) 2
14. Charging Port
15. microSD Card Port
16. Clamp Release Button
17. Clamp for Smart Device

Definition, Spool and VR Goggle

Spool and Tether

1. Spool Handle
2. Tether Regulator
3. Spool Frame
4. Tether ROV Plug
5. Foldable Handle
6. Tether RC Plug (3.5mm AUX plug)

VR Goggle

1. Housing
2. Smart Phone Bracket
3. Adjustable Clamp (suit from 3.5" to 6.0" smart phone)¹

NOTE:

Hold your cell phone when you lock and unlock the clamp.

Definition, Accessories

2D Image Sonar
Scan beyond visual distance
or visibility

U-QPS
Underwater position in real
time, and route plan search

Robotic Arm
Grab & retrieve subjects
below the surface

Water Sampler (500 mL)
Collect water sample from
certain depth and position

Definition, Accessories

UT Thickness Gauge
Detect coating or metal thickness in ship, offshore infrastructures

Q-Camera with LEDs
Provide secondary view for underwater survey

DVL
Auto holding position, seabed speed

pH Sensor
Monitor pH in real-time

Definition, Accessories

HDMI Box 2.0

Download original resolution videos when recording, LIVE output HDMI signal

RC Sun Hood

Provide shade for tablets

Edge Box

Enable to remote control globally

There are more accessories on the way.

For more information about add-ons or accessories, contact our local authorized dealers for an on-site demonstrations.

Preparation, Check and App Install

Checking List

1. Gears checking
2. Battery is full (ROV, RC, cell/tablet)
3. ROV sensor calibration ¹
4. Smart device compatibility ²
5. Enough memory for recording/picture
6. Team role setting (pilot, tether man, guide)
7. Entanglement threats, such as, the boat engine, underwater structures, and corals etc.

NOTE:

1. If you travel to elevated lakes, low land lakes, or air pressure has changed. Do a ROV sensor calibration is highly recommended (Check ROV Sensor Calibration in page 22)
2. The best compatible smart devices list in, in FIFISH App, help/FAQ/Before Dive, #6

FIFISH App download and Installations

- Option 1. Scan the QR code below to download FIFISH App.
Option 2. Search the FIFISH on App Store (iOS) or Google Play (Android).
Option 3. Go to QYSEA's website at <https://www.qysea.com/support/app-download/>

Preparation, Set-up, Hardware

2. Hardware Connection

Overview of hardware connection

2.1. Plug the tether (3.5 mm head) into remote controller

Preparation, Set-up, Hardware

2.2. Take off the protect cap, tie the knot around the rear wing

2.3. Plug the ROV Plug into the ROV Tether Port (**finger tight**)

2.4. Turn ON the RC. Press and hold the ON/OFF button (3 seconds)

- RC will play 7 chimes from low to high (Do, Re, Mi, Fa, Sol, La, Ti)
- ROV will turn on automatically, and play 5 chimes (Do, Re, Mi, Do, Mi)

Preparation, Set-up, Hardware

2.5. Take off the protect cap, tie the knot around the rear wing

- The "ON/OFF", "Depth Holding" and "LOCK/UNLOCK" will flash and rotate clockwise, which indicates "Ready to be connected"
- In about 30 seconds, the "ON/OFF" and "LOCK/UNLOCK" buttons will stay solid that indicates the hardware connection successfully

Preparation, Set-up, Software

3. Software Connection

- 3.1. Smart device connect with the RC's Wi-Fi (5 GHz)
- Find the Wi-Fi network name "FIFISHRC_xxxx"
 - The password is "1234567890"

- 3.2. Open FIFISH App, then press "Go Dive"
- Allow access to photo albums, location, and notifications
 - Even the network did not connect to internet, select the "Keep Trying WLAN" for iOS user, "Stay Connected" for Android user.

NOTE

The operate interface will be introduced in chapter **FIFISH App**, page 16-17

Preparation, ROV Sensor Cal, Deploy and Retrieve

4. ROV Sensor Calibration (Check the FIFISH App Charter, ROV Sensor Calibration Page 22)

- 4.1. Go to **General Setting**
- 4.2. Select the **ROV Sensor Icon**
- 4.3. Follow the hit on FIFISH App step by step, first **Gyro-Acce** then **Mag**
- 4.4. **Reboot ROV** in FIFISH App, and Power ON/OFF RC if necessary

5. Deploy the ROV

- ONLY pulling on the tether to deploy the ROV into the water.
- Unlock the thrusters then start to dive.

NOTE

The depth shall greater than 1 meter (about 3 feet) for better operate experiences.

6. Retrieve

- 6.1. **LOCK** the thrusters
- 6.2. **STOP RECORDING** the video before closing the FIFISH App
- 6.3. **ONLY PULLING** on the tether to retrieve the ROV

Controlling, Definition

Definition of Controlling

The FIFISH PRO V6 Expert uses the patented **Smart Thruster Array™** to ensure the ultimate maneuverability and delivers the 6 DOF (degree of freedom).

- V6 Expert can move in descend & ascend, left and right, forward and backward.
- V6 Expert can rotate in 360 yaw (z-axis), 360 pitch (y-axis), 360 roll (x-axis).

We have simplified the Left Joystick, Right Joystick, Left Wheel and Right Wheel into the following symbol. The arrows on RC indicate the command and the arrows on ROV indicate the actual movements.

Remote Controller	V6 Operation Preference Setting	
	ROV Modes (USA/JPN/CHN)	UAV Modes (USA/JPN/CHN)
	<p>Ascend</p> <p>Descend</p>	<p>Pitch Up</p> <p>Pitch Down</p>
	<p>Left</p> <p>Right</p>	<p>Roll Counter Clockwise¹</p> <p>Roll Clockwise¹</p>

NOTE:

From the FPV (first person view) the **blue** is rolling counterclockwise and **black** is rolling clockwise, and the rolling can activate in Sport or Combination Mode.

Controlling, Controlling Modes

Controlling Modes

FIFISH PRO V6 Expert supports 3 modes for control: A, S, and C. A is Attitude mode, S is Sport mode, C is the Combination mode.

Attitude Mode

Attitude mode is designed for beginners. The ROV will not roll in Attitude mode. The ROV will stay in same depth moving when depth holding is ON. Even with pitch angle, the depth will be the same.

Sport Mode

Sport mode is designed for skillful pilots. Sport mode will enable the rolling freedom, so, you will access all 6 degree of freedom of V6 Expert. Controlling and moving based on the FPV (First Person View), do not operate in third person view. The ROV will only stay in the same depth with no command input, when depth holding ON.

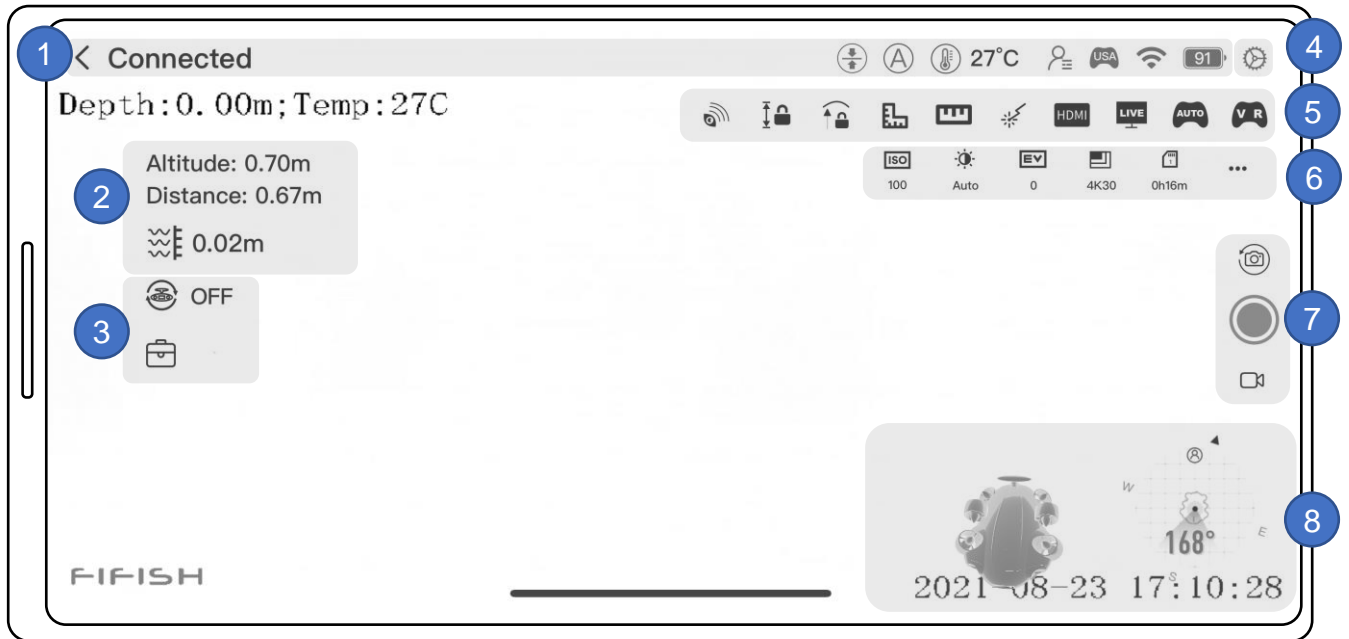

Combination Mode

Combination mode activate the head tracking controlling via FIFISH VR Goggle, which allow pilot to use the FIFISH VR Goggle to pitch, roll and yaw. Combination mode delivers the intuitive control and immersive experiences. Combination mode supports head tracking and remote controller working together.

Accessories Attached

The right wheel will ONLY be working in Attitude mode or Combination mode for motor driven accessories. *For example, robotic arm, water sampler, robotic fish clamp, and compass ruler, and sludge sampler etc.*

FIFISH App, Operate Interface

FPV Interface in FIFISH App

1. Status
2. Navigation Information
3. Additional Features
4. General Settings
5. Additional Features*1
6. Image/Video Setting Shortcut
7. Image/Video Button
8. Navigation Chart

NOTE:

The additional features will active when attached such accessories.

FIFISH App, Operate Interface

Status

1. Current System Status
2. Depth Holding ON/OFF
3. Control Mode
4. Water Temperature in C/F
5. Pilot or Spector Status
6. Controlling Preference
7. RC's Wi-Fi Signal
8. ROV's Battery in Percentage

Navigation Information

9. Altitudinal Distance
10. Frontal Distance
11. ROV Current Depth

Navigation Chart

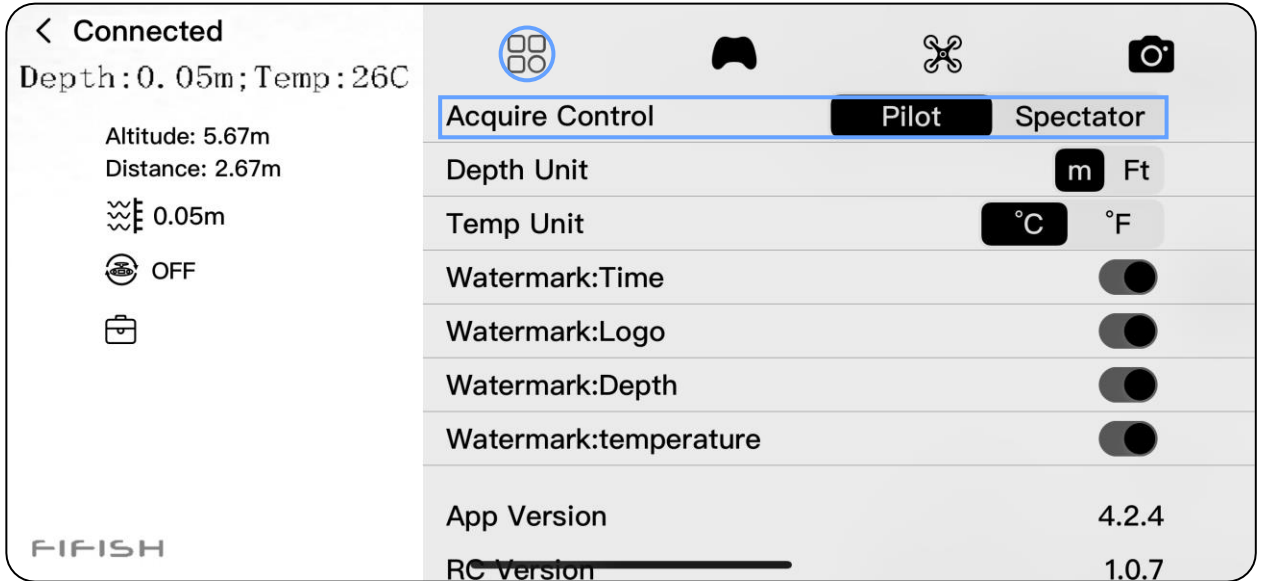

12. Pilot's Heading
13. Compass
14. ROV's Heading in Degrees
15. Posture Indicator

Camera Setting Shortcut

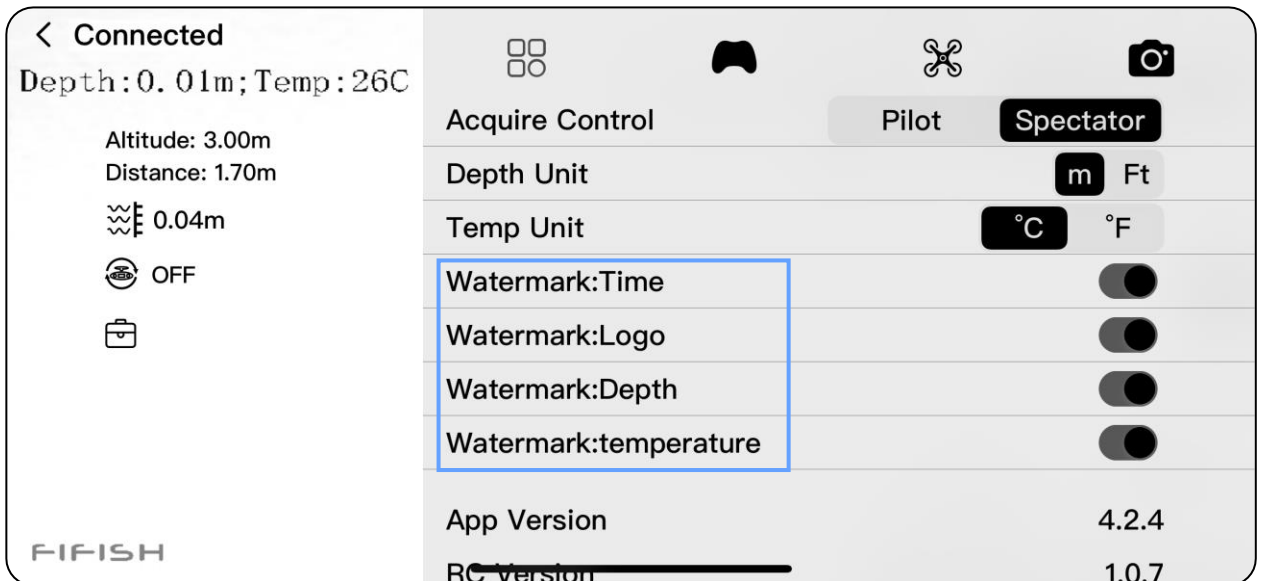

16. Camera Setting
17. ISO
18. White Balance
19. Exposure Value
20. Resolution Frames Rate
21. Remaining Time / Pics

FIFISH App, System Setting

General Settings, Select **System Setting Icon**  in 1st column

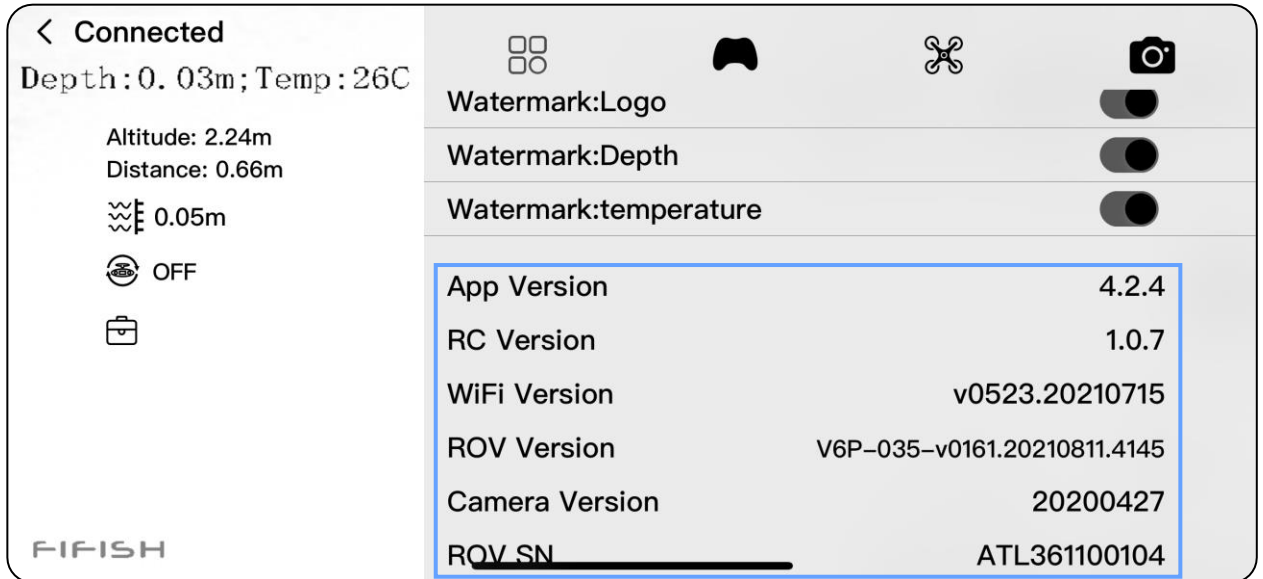

- If you have 2 devices connect to the RC, Click “**Acquire Control**” to get access controlling and adjusting settings
- ONLY the “**Pilot**” can manipulate the settings, such as, watermarks, control preferences, camera settings etc.

- The “**Watermark**” ON will record to video or write on photo, “Watermark” OFF then no trace on video or photo
- Watermark in Time, FIFISH Logo, ROV Depth, Water Temperature

FIFISH App, System Setting

Scroll down the system setting page, the system version information will show up

- The App Version is the FIFISH App version in your cell or tablet
- The RC Version is the RC's motherboard version
- WiFi Version is the RC's Wi-Fi module version
- ROV Version is the ROV's current software version
- Camera Version is the camera module software version
- ROV SN is the identical SN for this ROV

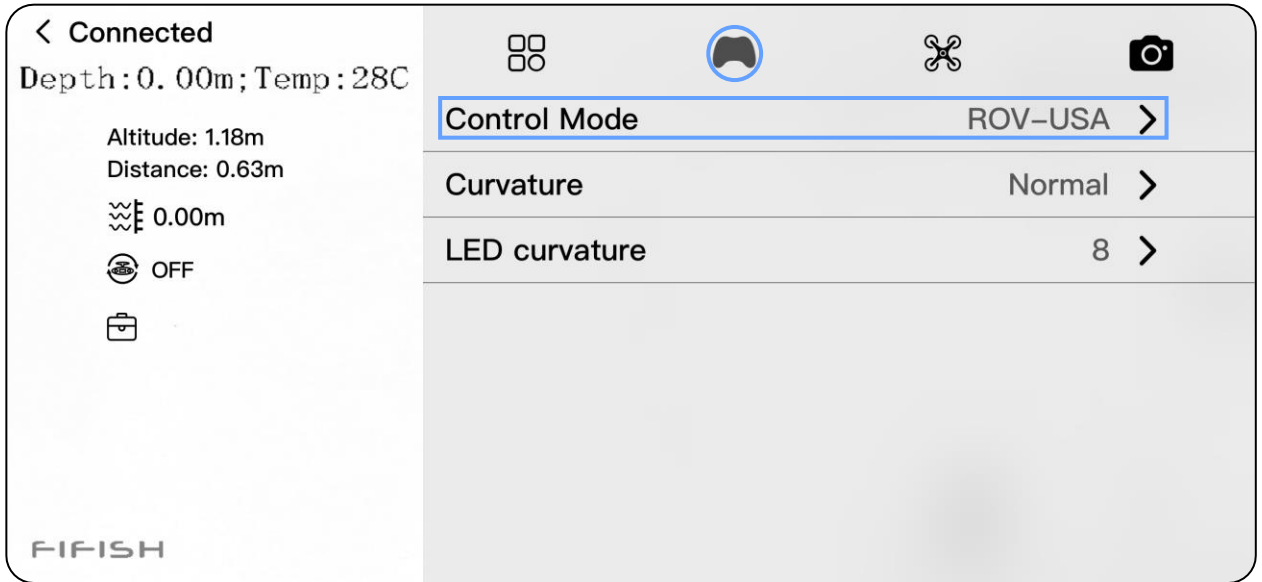

NOTE:

Screen shot of these versions for remote technical support when you are facing any issues.

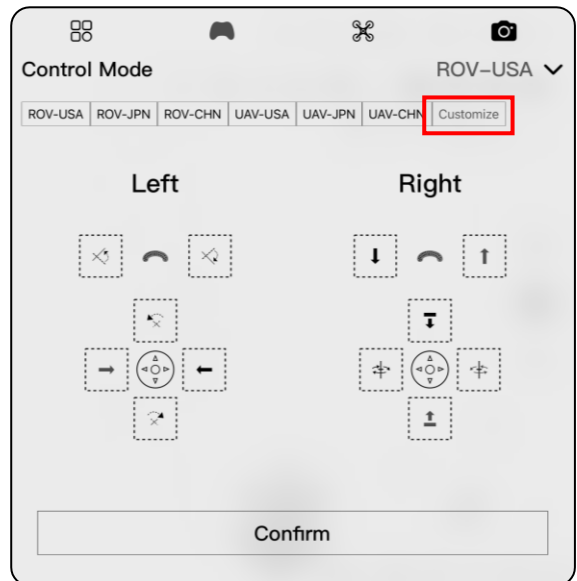

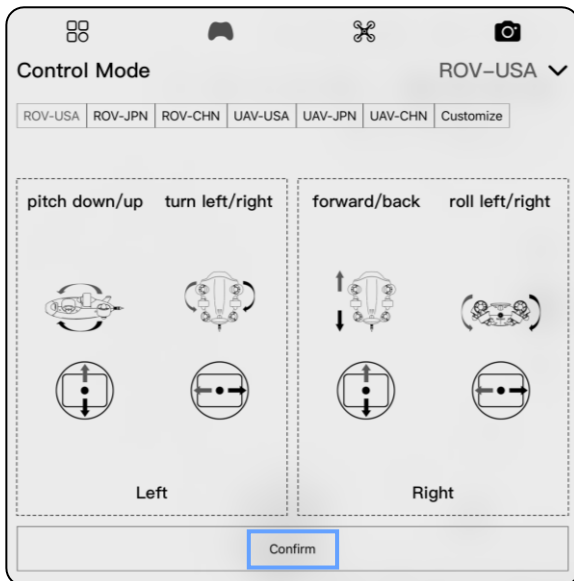

FIFISH App, Controlling Preferences

Controlling Preferences

General Settings, Select **Controlling Preferences Icon**  in 2nd column

- Click “**Control Mode**”, the default is ROV-USA Control Mode, you can select your preferences if you like
- Click “**Confirm**”, after setting

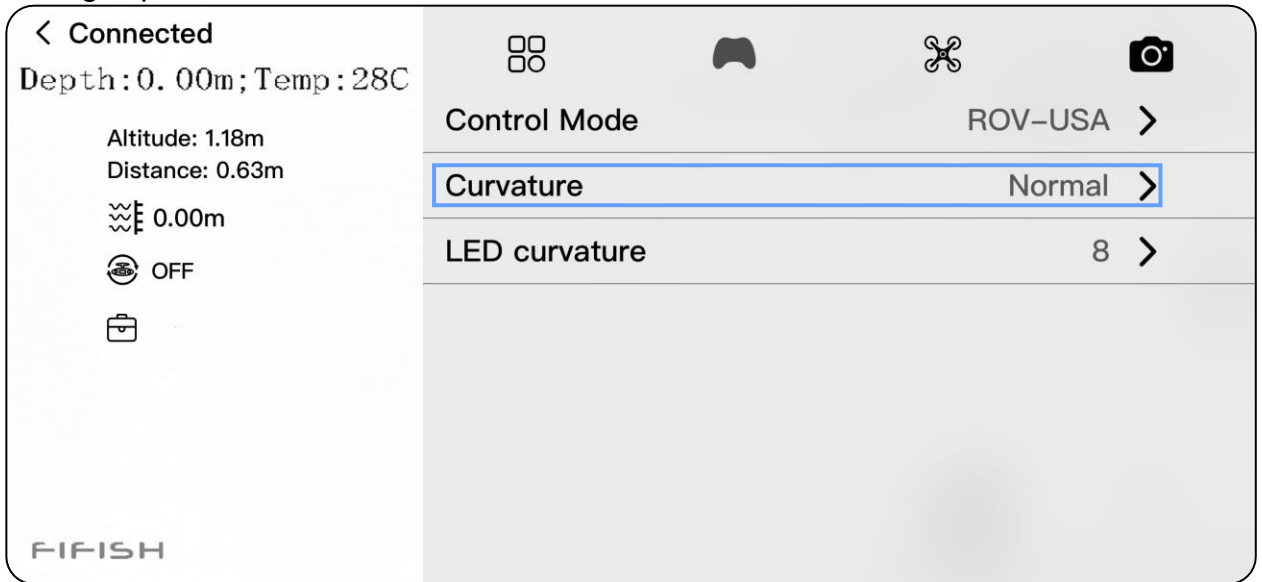

****As for advance level pilot seek for customized setting demo. Please check FIFISH authorized local Dealer or Service Center for more details and training programs.**

FIFISH App, Controlling Preferences

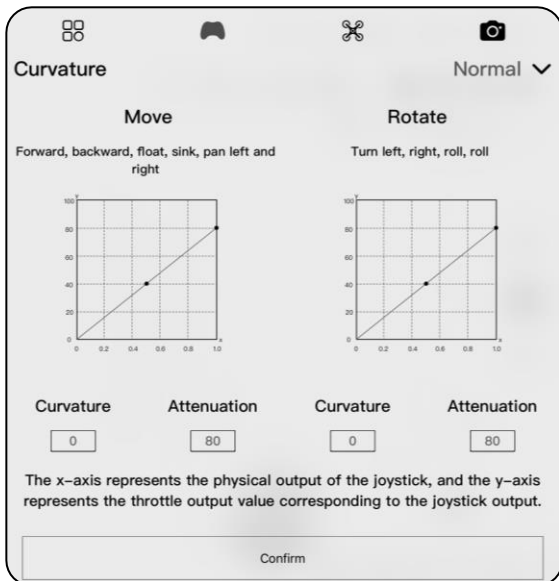

Control Curvature

For the advance level pilot, the curvature setting can provide more **FUN** and **ACCURATE** operating experiences.

Set the Move & Rotate

- Adjusting the curvature (set the center sector output sensitivity)
- Adjusting the attenuation (set the maximum output)

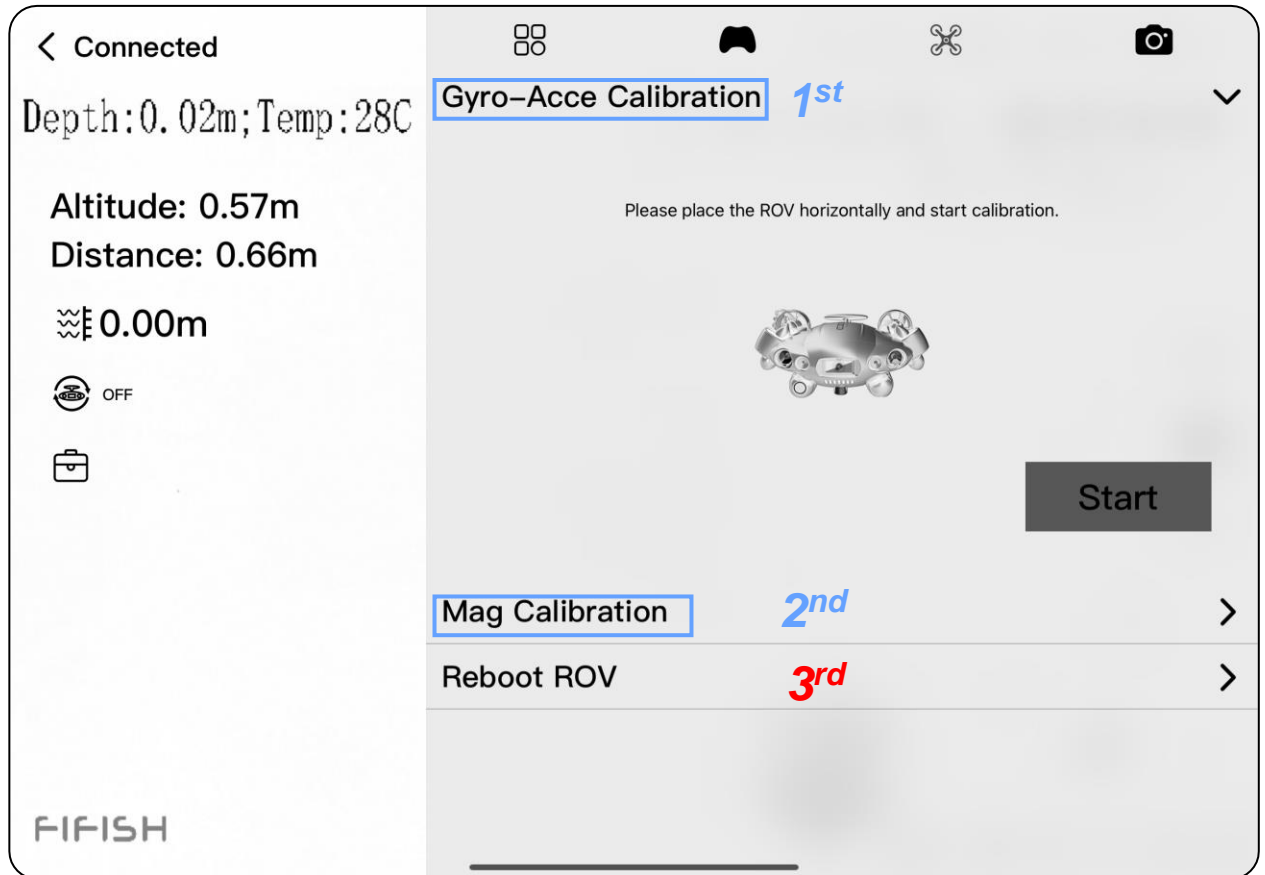

****As for advance level pilot seek for explore curvature setting tips. Please check FIFISH authorized local Dealer or Service Center for more details and training programs.**

FIFISH App, ROV Sensor Calibration

ROV Sensor Calibration

Select the **ROV Sensor Icon**  in 3rd column

- Follow the hit on FIFISH App step by step, first **Gyro-Acce** then **Mag**
- **Reboot ROV** in FIFISH App, and Power ON/OFF RC if necessary

FIFISH App, Camera

The **Main Camera Internal Storage** is ROV's main camera internal memory status.

- Click “**Main camera internal storage format**” will erase the internal memory of main camera
- Click “**restore factory settings**” will reset to default camera settings

FIFISH App, Features, Camera

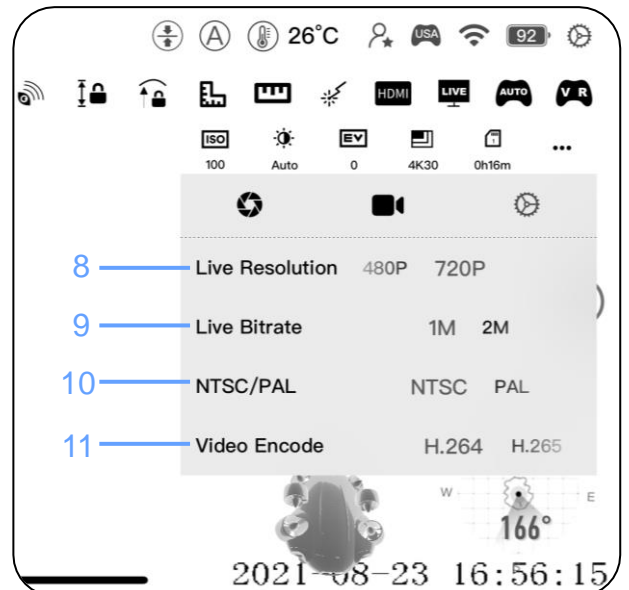

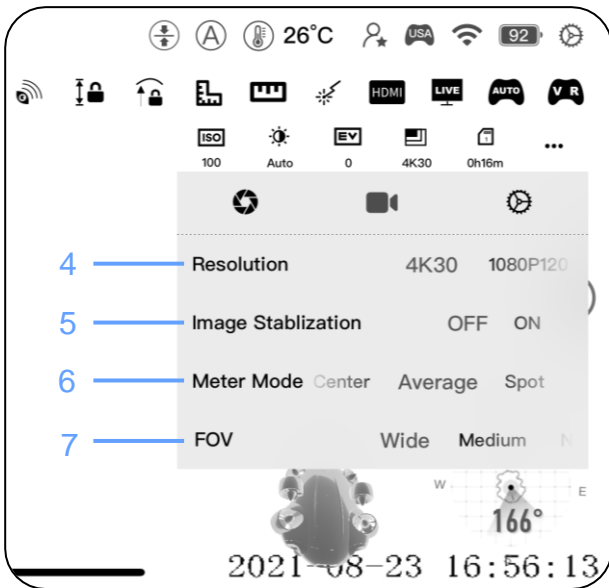

Image Settings

1. Exposure and WB
2. Video Setting
3. Camera General Setting
4. Resolution
5. Image Stabilization
6. Light Meter Mode
7. FOV Settings

Camera General Setting

7. Live Resolution on FPV
8. Live Bitrate on FPV
9. Color Encoding
10. Video Format

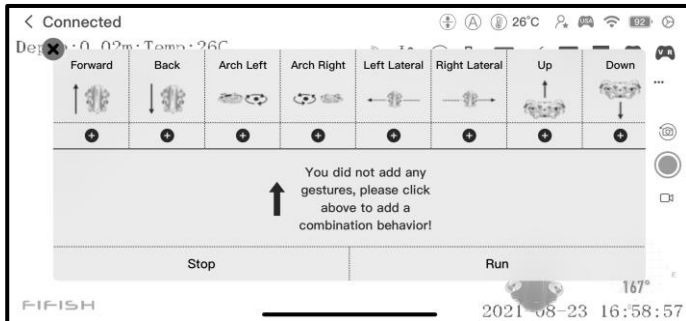

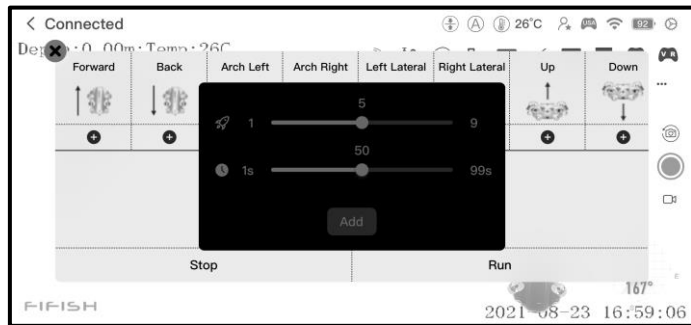

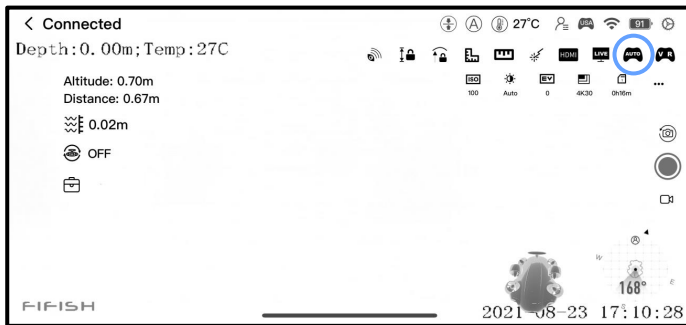

NOTE: *Shortcut camera setting will have the same results.*

FIFISH App, Features, Auto Pilot

Auto Pilot 2nd Gen

The Auto Pilot 2nd Gen is able programable auto moving commands.

1. Press the "AUTO" to turn ON the Auto Pilot
2. Select moving behavior
3. Set speed of such segment
4. Set time of such segment
5. Program next segment
6. Click "Run" to activate the Auto Pilot 2nd Gen

FIFISH App, Features, Auto Pilot

Auto Pilot 2nd Gen

The Auto Pilot 2nd Gen is able programable auto moving commands.

FIFISH App, Features, LIVE Streaming

LIVE Streaming

Board casting directly on **YouTube, Facebook** or other social media network.¹

1. Generate a **Stream Key** and **Stream URL** on YouTube or Facebook
2. Click the **LIVE** icon 
3. Past the **Stream URL** and **Stream Key** in column
4. Select the LIVE quality (High, Medium, and Low)^{2, 3}
5. Click "**Start Live Streaming**"

NOTE:

1. This feature will request to use the **iOS devices**. For example, **iPhone** or **iPad** SIM card version.
2. LIVE stream feature will consume your **Cellular Data**, make sure you have enough Cellular Data in your data plan.
3. LIVE stream quality is depending on the local **4G or 5G network speed**.

FIFISH App, Features, HDMI Box

HDMI Box 2.0, Download to Flash Drive

- HDMI Box 2.0 also capable to download the original resolution video from ROV while recording.¹
- HDMI Box 2.0 will enable to display on a HDTV or transmitter for TV shows.
 1. Connect HDMI Box, and Insert a flash drive ^{1, 2}
 2. Click the **HDMI** icon 

3. The default is Download Mode, the new video will automatically download to flash/portable drive

NOTE:

1. Download and Display mode **CANNOT** work at same time, more information check the HDMI Box instructions
2. Format in **FAT32** or **exFAT**, read and write speed **100 MB/s** or higher, **USB 3.0**
3. Flash drive storage **128 / 256 / 512 GB**, portable drive **1 / 2 TB**

FIFISH App, Features, HDMI Box

HDMI Box 2.0, HDMI Output

- HDMI Box 2.0 will enable to stream to a HDTV or transmitter for TV shows. ¹

1. Connect to the HDMI Display or stream transmitter broadcasting devices
2. Click the icon  to active **Display Mode** 

NOTE:

1. Download and Display mode **CANNOT** work at same time, more information check the HMDI Box instructions
2. The default resolution is **1080P 60fps** when HDMI Box is on. (PLEASE DO NOT CHANGE THE RESOLUTION ON FIFISH APP)
3. The HDMI Output latency is about 500 ms

After-Dive, Packing

STOP RECORDING the video before closing the FIFISH App

Clean and wipe out water residue after dive and put gears back into package.¹

Video/Photo Download via microSD Hot Shoes²

Open/close the waterproof cover with **special key**. Close the cover with finger tight.

NOTE

1. Each part has its own slot, try a different direct if you facing any difficulties when putting parts back to original position. Do NOT squeeze or tear when packing, pay extra attention on bending or pressing on tether.
2. Video/photo download can be achieved via microSD slot on RC. Check our website for video tuitions at <https://www.qysea.com/support/> or FIFISH App/Help/College.

After-Dive

microSD Hot Shoes Cap Maintenance

1. Keep the cap and microSD Hot Shoes clean and dry.
2. Apply a thin layer of grease to the interior slot (Red area).

Motors Maintenance (After Every Dive)

1. Connect the RC to V6 Expert and open the FIFISH App (see Hardware Connection section, in Quick Start Guide).
2. Make sure every motor is immersed inside fresh water, see the picture (vertical soaking in bucket will have same results).
3. Open FIFISH App, homepage, Click "Help" on the bottom right corner. Click "Maintain/Thrusters", then press "Start". All motors will rotate slowly.
4. In about 10 mins this cleaning program will stop.
5. Air dry V6 Expert in the cool place and avoid direct sunlight.

Battery Maintenance

1. Keep 50% to 60% battery level before long term storage.
 2. Charge to full once every 90 days.
-

After-Dive

ROV Charging

RED LED indicator illuminates while charging and **GREEN** LED indicator illuminates while fully charged.

RC Charging

Flashing ON/OFF button, RC is charging
White steady ON/OFF button, RC is fully charged.

Red, less than 30%

Yellow, 30% to 70%

White, 70% or higher

Specifications

ROV

Dimension	383 mm × 331 mm × 143 mm	15 in × 13 in × 5 5/8 in
Weight	4.6 kg	10 1/8 lbs
Depth Rating	100 meters	328 feet
Speed	3.0 Knots (1.5 m/s), max speed in still water	
Thrusters	Q-Motor Tech × 6	4 × Vector + 2 × Horizontal
Maneuverability	6 DoF (Degree of Freedom)	
Moving	Sway	Left / Right
	Surge	Forward / Backward
	Heave	Up / Down
Rotation	360° in Pitch, Yaw and Roll *	
Posture Lock™	± 1.0° accuracy	Either in static or moving
Depth Lock™	± 0.01 m accuracy	Keep ROV suspending
Operating Temperature	-10°C to - 60°C	14°F to 140°F
Battery	1.5 hours run time when against 1 m/s current 6.0 hours run time in still water	
	14,400 mAh / 155.52 Wh	Rated Capacity
	1 Hour Quick Charge (90%)	
	Panasonic 21700 Li-ion	

microSD Card requirement for Hot Shoes

Read / Write Speed	80 MB/s or up (Write)	
Capability	64/128/265/512 GB	
Format	exFAT	
Recommendations	SanDisk (Ultra/Extreme/Extreme Pro) or Samsung, Kingston, Toshiba's microSD card with similar speed	

Q-Interface

Port Number	1 port	
Material	316 Stainless Steel	
Output Voltage and Current	9.0 ~ 12.0 V, 2.5 A max	
Network Bandwidth	100 Mbps	

Specifications

Camera

Image Sensor	1/2.3"	SONY CMOS
Pixels	12 Mega Pixels	Effective Pixels
ISO Range	100-6,400	Auto / Manual
Lens	166	Filed of View (in air)
	f/2.5	Aperture
	0.4 m	Minimum Focusing Distance
Shutter Speed	5 to 1/5000 second	Auto / Manual (Electronic)
Burst Shooting	3 / 5 / 10 / 15	Frames
WB (White Balance)	2,500 to 8,000 K	Auto / Manual
EV (Exposure Compensation)	- 3.0 ~ + 3.0 EV	
Video Resolution	4K UHD	25/30 fps
	1080P FHD	25/30/50/60/100/120 fps
	720P HD	25/30/50/60/100/120/200/240 fps
Video Format	MPEG4-AVC/H.264, HEVC/H.265	
Stabilization	EIS (Electronic Image Stabilization)	
Photo Resolution	4,000 × 3,000	
Photo Format	JPEG, RAW in DNG	
Storage microSD	64/128/256/512 GB	Standard SanDisk Ultra 128GB

LED Beams

Brightness	6,000 lumens	
CCT (Correlated Color Temp.)	5,500 K	
Beam Angle	120°	
Dimming	OFF, 1, and 2	

Specifications

Tether and Spool

Tether Length	100 meters (Standard Package)	328 feet
Tether Diameter	4.0 mm	$\frac{3}{16}$ inch
Breaking Force	100 kgf	220 lbf
Spool Dimension	238 mm × 213 mm × 205 mm	$9 \frac{3}{8}$ inch × $8 \frac{3}{8}$ inch × $8 \frac{1}{16}$ inch
Spool Weight	2.08 kg	4 lbs 9 ounces

Remote Controller (RC)

Wireless	5 GHz Wi-Fi 11 a,n, ac	
Battery Life	Up to 4 hours	
microSD Card Slot	microSD card format in FAT32 or exFAT (≤ 128 GB), class 10 or higher write and read speed.	
miniUSB Port Bandwidth	100 Mbps	

Charger

ROV	100-240 V, 50/60 Hz, 3.0 A	Max Input
	12.6 V = 10.0 A	Output
RC	100-240 V, 50/60 Hz, 0.5A	MAX Input
	5.0 V = 3.0 A	Output

Disclaimer

We provide customers with after-sale services, excluding the following circumstances,

- Crashes damage caused by non-manufacturing factors, including but not limited to, pilot errors.
- Damage caused by unauthorized modification, disassembly, or shell opening not in accordance with official instructions or manuals.
- Damage caused by improper installation, incorrect use, or operation not in accordance with official instructions or manuals.
- Damage caused by a non-authorized service provider.
- Damage caused by unauthorized modification of circuits and mismatch or misuse of the battery and charger.
- Damage caused by dives which do not follow instruction and manual recommendations.
- Damage caused by operation in bad water conditions (i.e. strong currents, huge waves, etc.)
- Damage caused by operating the product in an environment with electromagnetic interference (i.e. in mining areas or close to radio transmission towers, caves, muddy condition, radiations, tunnels, etc.).
- Damage caused by operating the product in an environment suffering from interference from other wireless devices (i.e. transmitter, video-downlink, Wi-Fi signals, etc.).
- Damage caused by a forced dive when components have aged or been damaged.
- Damage caused by reliability or compatibility issues when using unauthorized third-party parts.
- Damage caused by operating the unit with a low-charged or defective battery.
- Uninterrupted or error-free operation of a product.
- Loss of, or damage to, your data by a product.
- Any software programs, whether provided with the product or installed subsequently.
- Failure of, or damage caused by, any third-party products, including those that QYSEA may provide or integrate into the QYSEA product at your request.
- Damage resulting from any non-QYSEA technical or other support, such as assistance with "how-to" questions or inaccurate product set-up, installation, and firmware upgrade.
- Damage caused by operating the ROV in the sensitive zone (military, natural resource protection zoning, marine conservation and ocean conservation, etc.)
- Damage caused by unpredictable factors (current, cave collapse, swallow by animal, etc.)
- Products or parts with an altered identification label or from which the identification label has been removed.
- The presence of water droplets or water stains on the ROV may be due to the running tests in water performed at our factory. This will not affect the features and function of FIFISH underwater robot.

For more information, please check our website for tuition videos, or read FAQ in FIFISH APP/help/FAQ.

For latest version of use guide/manuals and other instructions, check on our website.

<https://www.qysea.com/support/user-manual/>
